# ANTONI REQUENA

SOFTWARE ENGINEER &  
PROFESSIONAL VIOLINIST

## EXPERIENCE

### SOFTWARE ENGINEER

(jan 2020 – mar 2020)

#### Drivania Chauffeurs

Backend PHP engineer role in a Microservice-oriented environment. Working and designing new projects using Domain Driven Design approaches and applying SOLID principles in every new/existing project. Main frameworks used: Symfony4, Laravel5

### CTO & CO-FOUNDER

(2019 – present)

#### Systinver Analysis, S.L.

Entrepreneurial project. Design and implement a digital platform with a subscriptions model (Stripe). Using Docker&Dokku to deploy it. Main technologies: PHP (Laravel API), Reactjs, MySQL, Docker, Dokku, Linux

### SOFTWARE ENGINEER

(2015 – 2018)

#### qGenomics

Main tasks: Design, develop and maintenance of different apps to handle client petitions, internal procedures, stock, report creation, etc. Main technologies: PHP (Laravel), HTML, Javascript, MySQL, Linux.

### INTERN

(2014 –2015)

#### Viapps

I joined Viapps in September 2014 as an intern during 10 months. My main task was to develop a SNMP module for Viapps project in C programming language. I worked with technologies like memcached, collectd, automake, autoconf, among others.
